

STARBAR™

WHY IS IT GREEN?

STARBAR™ glass fiber composite reinforcement is 4x lighter compared to conventional steel rebar, significantly reducing GHG emissions during transport. STARBAR™ is locally manufactured.

PRODUCT FEATURES

- STARBAR™ glass fiber composite reinforcement does not corrode or oxidize in water.
- Ease of construction – 4x lighter than conventional steel rebar.
- Up to 2–2.5x higher strength than conventional steel rebar.
- Improved application for environments with high corrosion hazard such as road decks and marine structures.
- Improved application for magnetically sensitive environments including imaging facilities and hospitals.
- Available in straight bars, mesh bars, and shape bars.
