

# EBARA HYDRO BOOSTER SYSTEM TYPE: UE

## WHY IS IT GREEN?

Ebara Hydro Booster system is designed with IE2 and IE3 high-efficiency motors. The UE system controller is able to operate with integrated built-in or conventional Variable Frequency Drive (VFD) that controls the pump speed to achieve energy efficiency by regulating the pump speed to meet the actual pumping requirement.

## PRODUCT FEATURES

- Constant pressure performance
- Energy saving system
- User friendly graphic display, ease for setting and operation
- Touch screen technology with backup button push on switches
- Water hammering prevention
- Alarm and operation data log available
- Internet web data communication available
- Listed in JKR Green Product Directory

Ebara provides total warranty on all components used or supplied (value for money). Each booster system set is fully-assembled and tested in factory to ensure trouble-free operation at site. The Ebara Hydro Booster System Type: UE system is able to meet any type of application where pressure control is needed such as:

- Building water boosting
- Municipal water supply
- General industry
- Irrigation

## PRODUCT CERTIFICATION & COMPLIANCE

- ISO9001:2015
- WRAS
- MyHIJAU
