ENERGY EFFICIENCY

SPECIALTY

WHY IS IT GREEN?

InviroTech-Trion Electronic Filter Bank is an excellent solution for improving Indoor Air Quality in commercial applications. It reduces HVAC system operating cost and has easy system maintenance procedures as it is designed for easy mounting in packaged and custom air handling systems.

InviroTech-Trion Electronic Filter Banks have high filtration efficiency in a face velocity range of 300 to 500 fpm and low pressure drop, and therefore it is an appropriate means of energy saving and IAQ enhancement.

PRODUCT FEATURES

- Unit Capacity from 500 cfm to 2000 cfm (3400 m³/hr). Multiple units can interconnect to meet system air flow requirements.
- Solid-state, self regulating power supply which maintains peak efficiency as cell loading occurs.
- Indicator lights signal proper operation.
- Capable of interfacing with building managements systems.
- Superior high-voltage contact design.
- Automatic notification of fault conditions.
- Wash indicator light to know when it time to clean the filter.
