## WHY IS IT GREEN?

Solvent cement products contain hazardous chemicals and Volatile Organic Compounds (VOCs), which emit smog-forming chemicals that can be harmful to users and installers and to our environment. Most of these products pollute indoor and outdoor air quality causing respiratory and eye irritation.

Paling Low VOCs solvent cement reduces the VOC emissions and improves the air quality, allowing for a better working environment, health and safety for individual and installer using these products. The VOC limit meets the most stringent requirement indicated in Green Building Index (GBI) – VOC limit of 510 gram/liter.

## PRODUCT FEATURES

- Improves air quality, allowing for a better working environment
- Special formulated for jointing of PVC piping system
- Available in fast dry and slow dry to suit PVC piping system jointing of difference dimension
- Exclusively coloured for ease of installation inspection, clear solve are also available
- Proven performance with SIRIM certified and SPAN approved
- It is safe and eco friendly
- Range of products
- Solvent Cement Fast Dry (Green / Clear)
- Solvent Cement Slow Dry (Blue / Clear)
- Elegance (Clear)

## PRODUCT CERTIFICATION & COMPLIANCE

- SIRIM QAS International Sdn Bhd, License No. PP005833, comply with MS628-4:2015
- Suruhanjaya Perkhidmatan Air Negara (SPAN), Listing No.: 300-10/228/A/W-7
