

SUN-FOIL® PREMIUM SERIES ALUMINIUM FOIL

WHY IS IT GREEN?

The SUN-FOIL® Premium Series Aluminium Foil acts as an effective radiant heat barrier which reflects 99% of radiant heat. It reduces heat transfer via radiation, thereby reducing the temperature. The low emissivity surface of the foil reduces convection of heat into the air space.

Insulation with SUN-FOIL® Premium Series Aluminum Foil allows a building to use less cooling energy to achieve and maintain thermal comfort. This will improve energy efficiency in a building.

Finally, the raw materials of SUN-FOIL® Premium Series are non-toxic and made up of 40%-70% pre-consumer recycled content which leads to a better product life cycle.

*Reflective aluminium foil is a radiant barrier. As such, air space must be provided adjacent to the reflective surface to ensure optimum product performance. In addition, highest performance is obtained when the product is clean and dust-free. Refer to supplier's installation guidelines for further details.

PRODUCT FEATURES

- **Excellent Reflectivity** – Double-sided pure aluminium reflects up to 99% of radiant heat.
- **Extra High Tensile Strength & Edge Tear Resistance** – Layer of woven fabric maximizes the tensile strength and prevent damages during delivery and installation.
- **Fire Retardant** – Classified as Class 'O' in accordance to British Standard Fire Test, BS 476-6 & BS 476-7.
- **Excellent Appearance & Lightweight** – Easy to carry and good appearance after installation.
- **Long Life Span** – Product comes with a warranty of 15 years. T&Cs apply.

PRODUCT CERTIFICATION & COMPLIANCE

- CIDB Perakuan Pematuhan Standard (Bahan Binaan)
- SIRIM Product Certification License (MS 2095:2014)
- Bomba Class 'O' certification
- ISO 9001:2015
- MGBC Certificate
